

Summary

Aspiring Business AI Engineer with hands-on experience in web development, AI-powered applications, and API integration. Skilled in HTML, CSS, JavaScript, and familiar with AI tools and technologies including Gemini API and prompt engineering. Strong problem-solving and learning abilities, with an interest in building practical, user-focused solutions that combine technology and real-world business needs.

Education

Bachelor of Science in Computer Science(Pursuing)

Bharathiar University	Coimbatore CGPA: 8.5	2024-2027
Higher Secondary Certificate	Coimbatore 83 pct.	2024

Skills

Programming C/C++, python, java	Web development HTML, CSS, JS, React Node.js, REST API's	Version Control Git, GitHub	DataBase SQL, MySQL, MongoDB
Core Computer Concepts Problem Solving , Data Structure, OOP's, Algorithms	AI Tools ChatGPT, GitHub Copilot, Claude	AI and GenAI Google AI Studio, Prompt Engineering. Gemini API	Data Science Python,NumPy, Pandas,Data Analysis,Data Visualization

Certifications

- Generative AI Mastermind – OutSkill
- Cloud Infrastructure – Oracle
- Web Development Fundamentals – IBMSkillsBuild
- Python For Data Science – NPTEL(Ongoing)

Achievement

- **Secured 2nd Place** in a Technical Quiz at an intra-college technical event.
- **Secured 3rd Place** in *Executive Suite*, a national-level inter-college competition held at *Sankara College of Science & Commerce*.
- **Participated in 2 Inter-College Datathons**, gaining experience in data analysis, problem-solving, and teamwork.

Projects

LifeOrbit AI — Personal Growth & Career Platform

AI, Web Technologies

- Developed an AI-powered platform for routine management, personal growth, progress tracking, and career guidance
- Designed features that connect user goals with personalized growth and career recommendations.

Slogan Architect — AI Copywriting & Brand Strategy Platform

Gemini API, React, TypeScript, Node.js, Web Technologies

- Built an AI-powered platform for generating, evaluating, comparing, and refining marketing slogans using the Gemini API.
- Implemented structured prompting, automated evaluation, and API reliability handling.

Saaraha Studio — Photography Portfolio

HTML, CSS, JavaScript

- Built a responsive photography portfolio with galleries, navigation, and interactive UI.
- Implemented JavaScript-based interactions to create a smooth user experience.
